EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 12-16 have been renumbered 10-14 respectively.

3. Authorization for this examiner's amendment was given in a telephone interview with Mr. Walker on 01/11/05.

4. The application has been amended as follows:

On page 6 of the specification, the second paragraph has been replaced with the following paragraph:

Figure 1 illustrates a first embodiment of the current invention, a continuous variable transmission system 100. A drive shaft 18 forms the axis for a cone member 20 which is slidably moveable axially with respect to the drive shaft 18. The drive shaft 18 rotates as a function of engine output and turns the cone member 20 respectively. The cone member 20

Art Unit: 3681

serves as a radially adjustable sun gear within a ring gear 12 of a fixed radius. The ring gear 12 thus communicates with an output shaft (not shown).

5. The following is an examiner's statement of reasons for allowance:

Claims 1-16 were indicated allowable and have been amended to overcome the rejections under 35 U.S.C. 112, 2nd paragraph.

The prior art of record does not disclose or render obvious a motivation to provide for a continuously variable transmission as defined by the limitations of claim 1; including a cone shaped member slidably moveable axially with respect to a drive shaft, a plurality of linkage arms with each pivotally connected to each of a plurality of radially extending wings of the cone shaped member, each of the linkage arm pivotally connected to a joining member, a ring gear encircling of and in interlocking communication with the cone shaped member, and the ring gear enclosed by a housing and pivotable about a fixed point.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ha D. Ho whose telephone number is (703) 305-0738. The examiner can normally be reached on M-Th 6:00-3:30 (1st Fri off, 2nd Fri 6:00-2:30).
